AppliedCME	1/6/2011	P	Rational Pain Management Strategies with Immediate-Release Fentanyl: Striking a Balance	Van Velle	HCP Education	n/a	Sam		TBD	Pending			A nationally focused educational curriculum designed to address one of the most compelling issues facing the US health care system—the appropriate use of transcutaneous immediate-release fentanyl (TIRF) and proper management of patients prescribed such products. Submitted to Covidien for support.	8/16 (Sam) Sent an email following up with Van on the status.
AppliedCME	12/6/2010	P	REMEDIES in Chronic Pain—Risk, Evaluation, and Mitigation Strategies: An Employer-Driven CME Initiative for Efficacy and Safety in Chronic Pain (REMEDIES)	Van Velle	HCP Education	n/a	Sam		TBD	Pending			REMEDIES in Chronic Pain "Risk, Evaluation, and Mitigation Strategies: An Employer-Driven CME Initiative for Efficacy and Safety in Chronic Pain" is an interactive, multifaceted CME initiative comprised of a core educational curriculum that focuses and builds upon the inherent inter-dependency of all the stakeholders in the diagnosis, treatment, and management of Chronic Pain (CP) in the ever changing environment of increased regulation and REMS. REMEDIES uniquely incorporates an active role of Employers, recognizing their interest in improving chronic pain outcomes for their workforce. This employer-driven component of the initiative places patients at the intersection of their Employer and their Physician, increasing their level of engagement by approaching them from two different pathways. Submitted to Covidien for support.	8/16 (Sam) Sent an email following up with Van on the status.
